

Announcing Abacus from the document solutions experts at ARC

Easy, Quick and Secure Print Management Software

Easy to use and deploy, Abacus will optimize your print environment and minimize waste

Contactless mobile workflow

Stay safe and control your copier/printer with a touchless process from your personal device

- Touchless access to your copier by scanning a QR code
- E-mail your files to Abacus and print them from any device
- Add and print files directly from your Cloud drives
- Update and configure your print job as you retrieve it
- Assign your printing cost properly to your department or project
- Manage all your printing securely, safely and on demand

Support home printing with Abacus

Home printing is now easy with a single virtual printer

Record billing of this print job

Cancel Submit

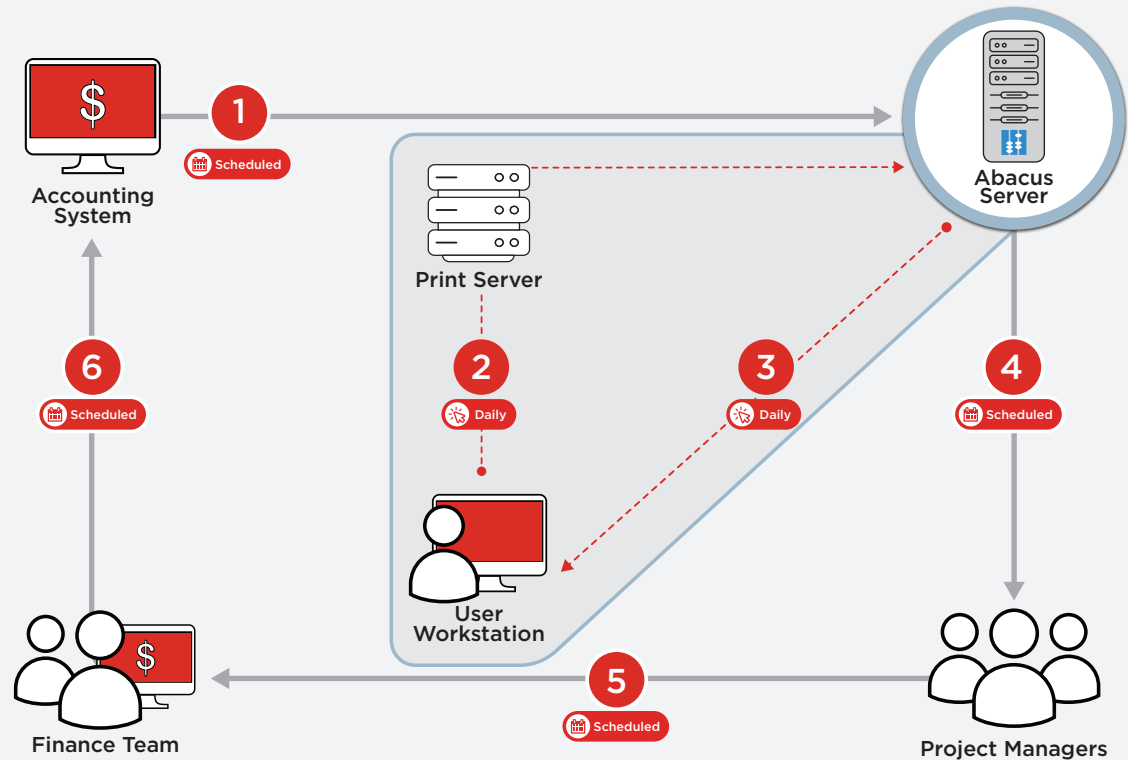

- **Print now** – billing and expense tracking for your home printer that allows you to flag each job as personal or work

- **Submit to Office** – proactively print your jobs from home to your office and they will be ready to retrieve when you arrive

- **Send to ARC** – for large, complex print jobs, let Abacus find the closest ARC Print Shop where they can print and deliver your job back to you

Seamless accounting integration

Track, review, and bill your projects easily and accurately with a direct integration from Abacus

- 1** Abacus keeps your projects, phases, and tasks in sync at all times
- 2** Print details are captured on every job submitted to ensure proper expense tracking
- 3** Project billing details are collected from the end user with a simple to use and customizable popup
- 4** Reviewing of the print activity is completed by each project manager to ensure proper project billing
- 5** Finance teams get a final review of the approved print activity to make requested updates and override any missing approvals required
- 6** Approved activity is pushed back into your accounting system for seamless project billing and proper cost allocation

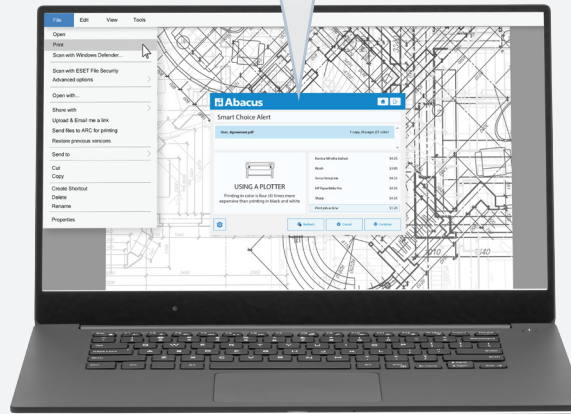

Smart Choice Questions

Control Your Printing

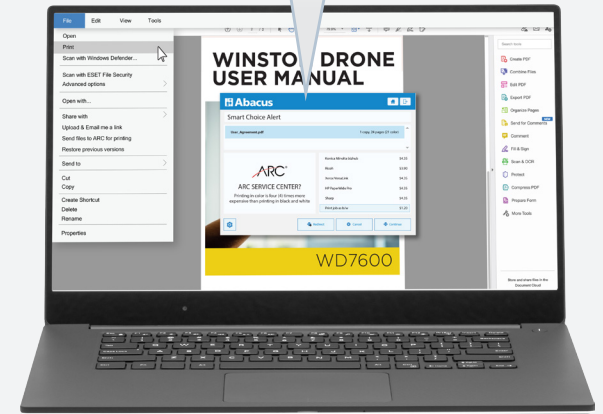

Abacus's Smart Choices guide users in making more efficient and cost-effective decision during the printing process.

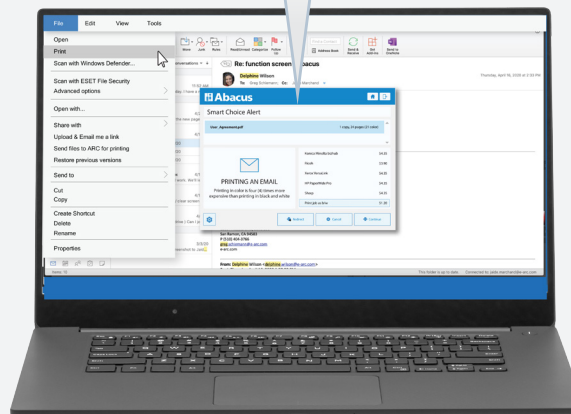

Are you sure you want to print this document on a plotter? It would be much less expensive to print on an MFP.

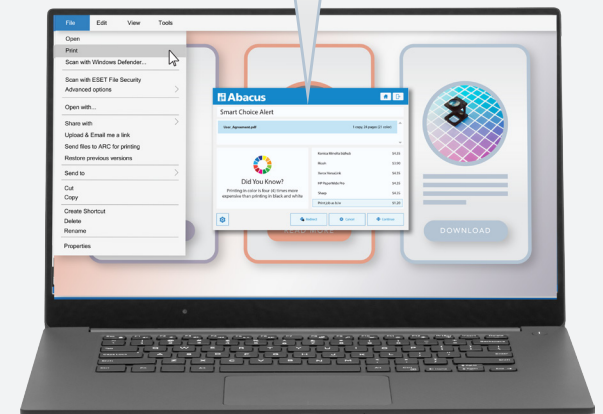

Instead of printing these 200 pages here, would you like to send it to your local [ARC Service Center](#)?

Are you sure you want to print that email?

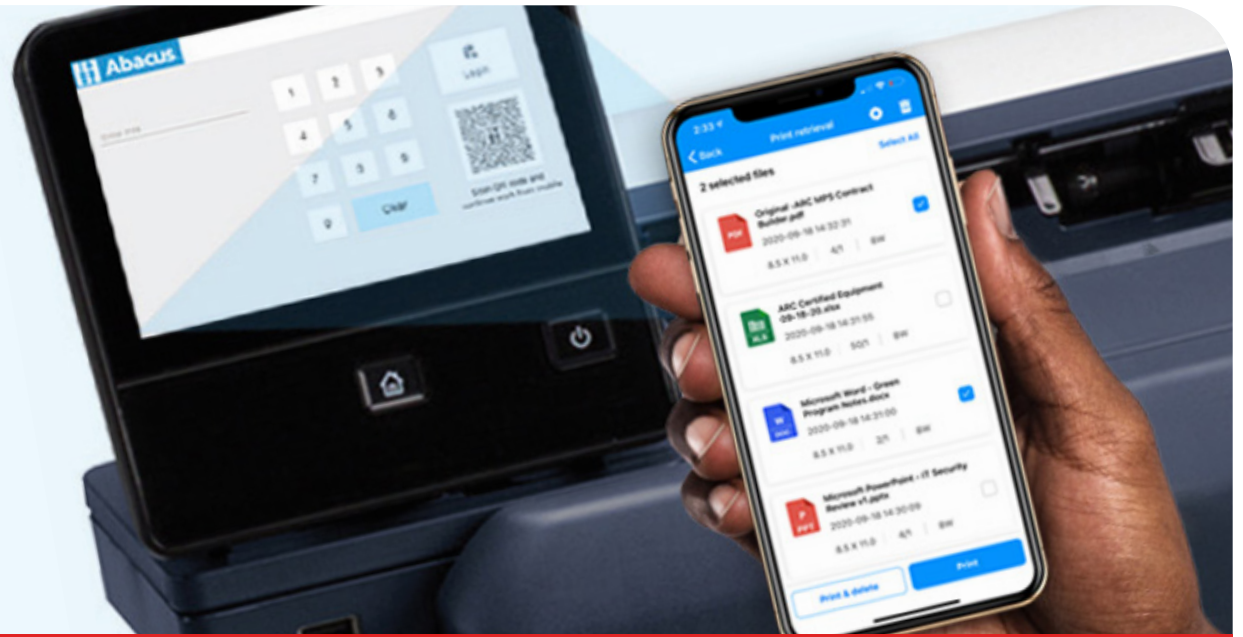

Are you sure you need to print in **COLOR**? Printing in black and white would save \$1.32

Secure Print Submittal & Retrieval

Give your staff their own document storage archive to simplify and secure their printing process.

My Personal Document Store is where your personal print documents are encrypted and securely stored until you are ready to retrieve them from any of your Abacus enabled print devices.

Add files to your Document Store by

- Printing
- Emailing
- Mobile app

Retrieve files from your Document Store via

- Copiers
- Printers
- Plotters

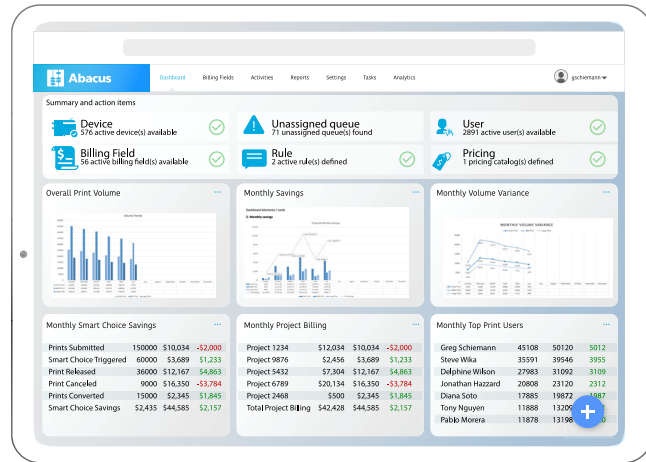

Access your Document Store by

- Entering a PIN on the device
- Using your mobile for touchless access
- Swiping your building access card

A simple secure solution that gives users a consistent experience across all devices in the office.

Gain control with insightful dashboards

Increase cost savings, deliver environment-friendly workflows, and achieve productivity improvements.

Abacus Web manager gives visibility into your entire companies print environment and users print behavior

Detailed, real-time reporting for project, department, and user activity

Quick dashboard views allow staff to review month over month project and print cost from their desktop

Simple configuration of print, scan, and copy functions help reduce IT time spent on print management
